

MATHEMATICAL PRACTICES**STUDENT FRIENDLY LANGUAGE**

<p>1. Make sense of problems and persevere in solving them.</p> 	<ul style="list-style-type: none">I can try many times to understand and solve a math problem.
<p>2. Reason abstractly and quantitatively.</p> 	<ul style="list-style-type: none">I can think about the math problem in my head, first.
<p>3. Construct viable arguments and critique the reasoning of others.</p> 	<ul style="list-style-type: none">I can make a plan, called a strategy, to solve the problem and discuss other students' strategies too.
<p>4. Model with mathematics.</p> 	<ul style="list-style-type: none">I can use math symbols and numbers to solve the problem.
<p>5. Use appropriate tools strategically.</p> 	<ul style="list-style-type: none">I can use math tools, pictures, drawings, and objects to solve the problem.
<p>6. Attend to precision.</p> 	<ul style="list-style-type: none">I can check to see if my strategy and calculations are correct.
<p>7. Look for and make use of structure</p> 	<ul style="list-style-type: none">I can use what I already know about math to solve the problem.
<p>8. Look for and express regularity in repeated reasoning.</p> 	<ul style="list-style-type: none">I can use a strategy that I used to solve another math problem.
